## **#4315 3D Export By Thmbnail Context Menu**

Since Release 3.2.78; the 3D exporzt window can also be opened by entry [Save] from the thumbnail context menu of a 3D finding on tab |Images/3D Data|. This will show the same dialog which also can be opened from the context menu of each object list or from the modul icon list Export Data|Save Objects].

However, this will only work if the export of the selected 3D objects is allowed by the used program version and license.
