

# Image Export to Pre-Defined Folder

---

New panel on tab |Third party Tools| in system options to define a standard export folder for image files using [Mergefields](#).

## Example Interface IIE-Systems (Dr. Visse)

- <https://www.dr-visse.de/>

The system creates web-based presentations from images saved in a linked folder.

The patient/partner receives a download link to view the images in a album or in a roundabout sequence.

To hand over patient image from Onyx (currently 2D only), on system options tab |Third Party Tools| ae export folder has to be defined using space holders:
