Image Export to Pre-Defined Folder

New panel on tab |Third party Tools| in system options to define a standard export folder for image files using Mergefields.

Example Interface IEE-Systems (Dr. Visse)

- https://www.iie-systems.de/
- https://www.dr-visse.de/

The system creates web-based presentations from images saved in a linked folder. The patient/partner receives a download link to view the images in a album or in a roundabout sequence.

To hand over patient image from Onyx (currently 2D only), on system options tab |Third Party Tools| ae export folder has to be defined using space holders:

System Options						
Patient Data	Practice Management Trios scans iEE-Systems Tool3 Tool4					
	☑ Item Visible Name: iEE-Systems					
Image Types	1. Hand over Master Data					
Sessions	☑ 2. Save Image Data					
Galleries	File C:\Temp\%1_%L,jpg					
Printouts	3. Bring Active Program to the Foreground					
F	4. Send Windows - Message					
Forms	5. Start Program / Open File					
Digitize	6. HTTP-Request					
Interfaces	Image Acquisition					
Third Party Tools						
Event						
Upload Data						
Email						
	Help 🖉 Close					

Useful Space holders (Mergefields):

Short cut	Meaning
%L	Index 1,2,3,
%6	PicFName
%7	PicCode (PatID+System code)
%G	Name of the session
%I	Image Type

To use the function, select images on tab |Images / 2D-Data| and strat transfer to folder by menu item [GoTo ...]
