

Image Export to Pre-Defined Folder

New panel on tab |Third party Tools| in system options to define a standard export folder for image files using [Mergefields](#).

Example Interface IEE-Systems (Dr. Visse)

- <https://www.iie-systems.de/>
- <https://www.dr-visse.de/>

The system creates web-based presentations from images saved in a linked folder.

The patient/partner receives a download link to view the images in a album or in a roundabout sequence.

To hand over patient image from Onyx (currently 2D only), on system options tab |Third Party Tools| ae export folder has to be defined using space holders:

System Options

Patient Data

Image Types

Sessions

Galleries

Printouts

Forms

Digitize

Interfaces

Third Party Tools

Event

Upload Data

Email

Practice ManagementScanner XYZOnyxQueryiieTool4

☒ Item Visible Name: iie

☐ 1. Hand over Master Data

☒ 2. Save Image Data

File D:\OnyxImages\%1\%I_%G_%X.jpg

☐ 3. Bring Active Program to the Foreground

☐ 4. Send Windows - Message

☐ 5. Start Program / Open File

☐ 6. HTTP-Request

☐ Image Acquisition - Bookmarks

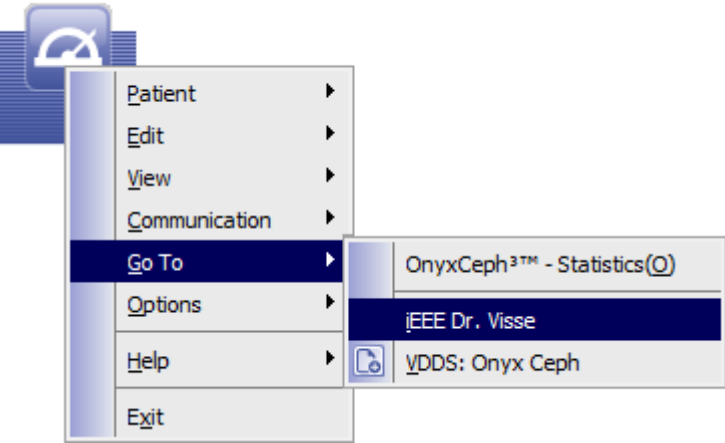

Help

Close

Useful Space holders ([Mergefields](#)):

Short cut	Meaning
%L	Index 1,2,3, ...
%6	PicFName
%7	PicCode (PatID+System code)
%G	Name of the session
%I	Image Type

To use the function, select images on tab |Images / 2D-Data| and strat transfer to folder by menu item [GoTo ...]
