

Aligner Manufacturing Integration

The control of hardware for machine trimming and labeling of aligners within automated production processes (Aligner Manufacturing Integration, AMI) is an additional option that has to be customized for each licensee and purchased separately. For availability and pricing, please contact Image Instruments directly.

Aligner Manufacturing Integration

(1) Trimline Export Feature and Manufacturing Interface

- Trimline computation in the 3D Export and export of trimline file next to geometry.
- OnyxCeph-side configuration for export settings, presets and process events.
- Custom postprocessing script for moving and renaming files.

[Trimline parameters](#)

(2) Option Extended Interface Script like

- Script notifying other applications via CLI or HTTP
- Changing file contents or formats for trimline
- Additional error or quality check for trimline

- Processing for laser-marking.

Costs: Customized development as per effort basing on task assignment.
