

# Enabeling IP Port 16300 on the Server Computer

The standard IP port which is used for OnyxCeph<sup>3</sup>™ client server communication is IP port 16300. This should be enabled inbound and outbound on the server via Windows™ control panel.

If another communication port was defined in the OnyxCeph<sup>3</sup>™ [database server settings](#) the alternative port should be enabled.

## Control Panel

In the Windows™ control panel, open topic [Advanced settings] in category [Windows defender Firewall]

## Inbound Rules

Select [Inbound Rules] and click [New Rule] on the right side

See also: [Port sharing](#)

## Outbound Rules

Select [Outbound Rules] and click [New Rule] on the right side

See also: [Port sharing](#)
