

System Options - Tab |3D Image Types|

On system options tab |Image types|, all 2D and 3D image types can be activated and configured usually used in the practice.

[Click on tab to switch to related topic]

OnyxCeph^{3™} supports pre-defined image types 2D and 3D, while settings and parameter can be adjusted in detail by the user to match the practice internal workflows as good as possible. Classification into different categories is helpful to use the individual functions.

Tab |3D Image Types|

Predefined [3D Image Types](#) are categorized into

- Image (Clinical Photo)
- Xray
- Model

The sequence of appearance can be modified by the [Arrow] buttons on top.
With the [Edit] button on the left, image properties can be adjusted in panels

- General
- Image Acquisition
- Tracing
- Slide View

regarding the settings available there.

The screenshot shows the 'Edit: Image Type' dialog box with the following sections and controls:

- General**
 - Image Type Name: (with edit and refresh icons)
 - Image Type Category: (dropdown menu)
 - Token:
 - Thumbnail:  (with 'Load...' and 'Delete' buttons)
- Image Acquisition**
 - Default Layout: ☒ Display 1 and 2 separately
- Tracing**
 -
- Slide View**
 - View: (dropdown menu)
 - Printing Form: (dropdown menu)

At the bottom are three buttons: (with question mark icon), (with checkmark icon), and (with X icon).
