

# Client Deinstllation

---

A local client can be uninstalled by running program [OnyxClientUninstall](#) . The program can be launched by link OnyxClientUninstall from program group OnyxCeph3 in the Windows™ start menu and will complete the following steps:

- Deleting local client folder ..\Onyx3Client
- Deleting program group OnyxCeph3 from the Windows™ start menu
- Deleting all desktop links/icons like OnyxCeph3™ or OnyxHelp (if appropriate)

By uninstalling a local client, no data or settings will be deleted. In case of re-installing the client for the identical Windows™ user login, the local [configuration](#) assigned to this client login will be reloaded.
