

# Guidelines for Editors

---

Layout and content of an article is decided by the author himself - the only guideline is that a new article should start with a headline level 2 (like this article) and contain one of the following search keywords (categories):

- Specification
- Installation
- Licensing
- Settings
- User Interface
- Workflows
- Ressources
- Hardware
- Partners
- Events
- Support

In OnyxWiki, option "embedded html" is allowed - example see playground
