

# System Requirements

OnyxCeph<sup>3™</sup> is a native Windows<sup>™</sup> application for a local client/server network. VPN connection to the server and cloud server configuration is not supported.

The following network server and workstation requirements should be met for use of OnyxCeph<sup>3™</sup> as intended.

## Network Server

## Network Client

*Note:*

The requirements for the network client apply equally to desktop and notebook clients.

For a single-user installation (database server and client applications on one computer), please refer to both sections.

The user's IT must take appropriate precautions to prevent third-party access to the ..\OnyxDB and ..\Pictures database directories.
