

# Tracing Options

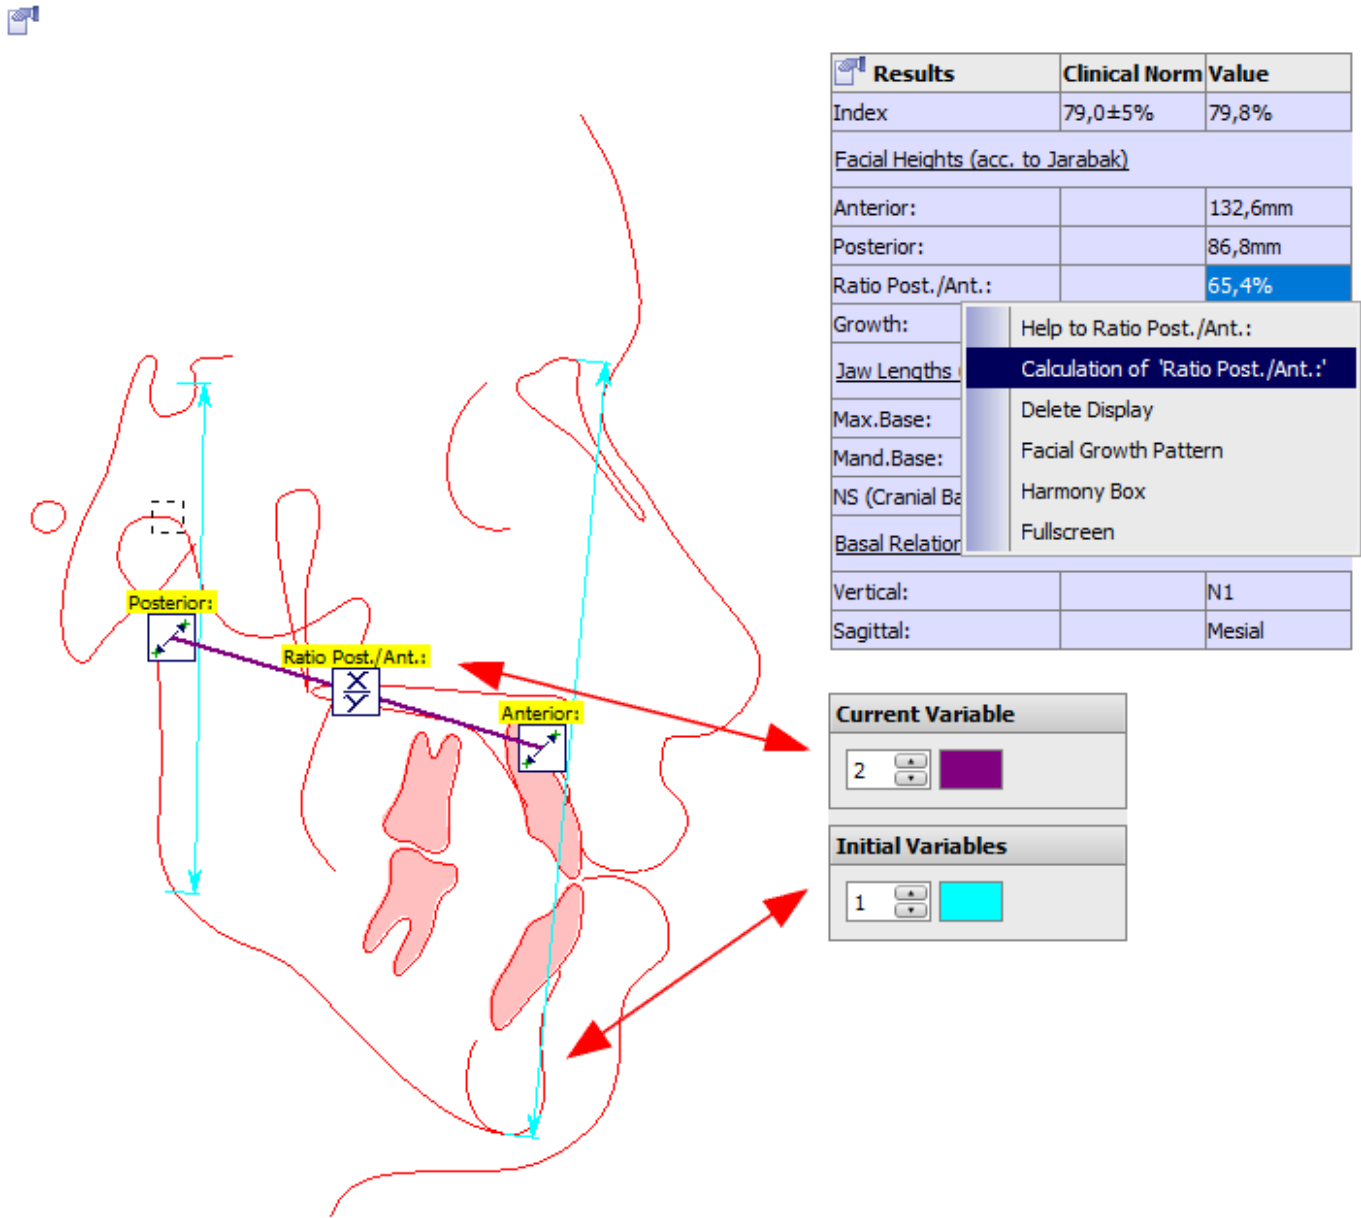

Using the [Options] button in the panel, you can make various settings on individual tabs with regard to graphics overlays on 2D and 3D image windows.

## Tab |Variables|

[Click on tab opens related wiki page]

In the context menu above a calculated value in the Results table in module Digitize, the definition used to calculate the value can be illustrated graphically.

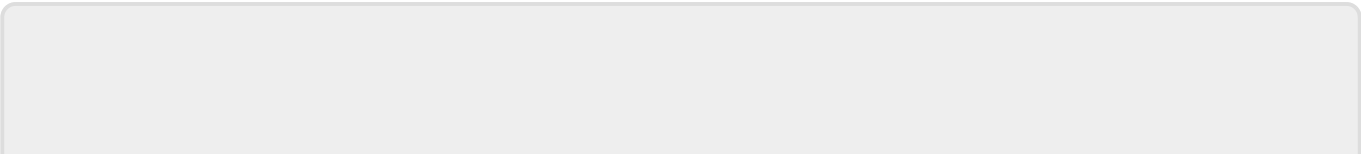

**Panel Current Variable**

The color and line width used for displaying the result variable can be specified here.

**Panel Initial Variables**

The color and line width used for displaying the initial variables can be specified here.
